Yiğit Efe Avcı Full-Stack Developer

yigit433.devs@gmail.com • github.com/yigit433 • linkedin.com/in/yigitefeavci • yigit433.vercel.app

About Me

I am a statistics undergraduate with a strong interest in data science, software development, and statistical modeling. I specialize in transforming data into actionable insights using tools like Python, R, and SPSS. My technical focus extends to full-stack development, where I utilize technologies such as React, Next.js, Go, and PostgreSQL to build scalable, efficient, and user-centric web applications.

Experience

Istanbul Chamber of Commerce Istanbul, Türkiye
Long-Term Statistics Intern, İTOSAM Statistics Unit October 2026 – Present
Statistics Summer Intern, İTOSAM Statistics Unit 10 August 2026 – 2 October 2026

- Actively contribute to the regular tracking and calculation of economic and commercial indicators, and assist in the development of index sets within the Strategic Research Center (İTOSAM).
- Perform time series analysis and seasonal adjustments on economic datasets to support the preparation of periodic statistical bulletins and reports.
- Contribute to data quality management, validation processes, and statistical methodology research to ensure data accuracy and reliability.

Ministry of Family and Social Services of Türkiye Istanbul, Türkiye
Archive Officer, Beyoğlu Law Unit 5 June 2026 – 7 August 2026

- Handled the archiving, registration, and tracking of legal case files and documents at the Istanbul Beyoğlu Law Unit.

Code Share London, United Kingdom
Managing Partner (Self-employed) August 2020 – May 2025
Software Developer (Freelance, Remote) June 2019 – June 2023

WiFiCeps Türkiye
Backend Developer (Project-based) January 2023 – February 2023

- Developed a custom media server for the WiFiCeps educational platform.
- Designed a system that monitored videos uploaded to Google Drive, detected updates, and automatically synchronized them with the platform's existing versions.
- Implemented an automated process that removed videos from the media server when they were deleted from Google Drive.
- Built a Python-based automation framework and an FFmpeg-powered video processing algorithm.
- Optimized video size and quality, reducing files to approximately ~50MB through automated processing.
- Significantly reduced playback issues and improved overall streaming performance.

Konda Research and Consultancy Türkiye
Field Researcher January 2025

- Conducted fieldwork for nationwide surveys, including face-to-face interviews and data collection.
- Ensured accurate and reliable input for research projects by following methodological standards and engaging directly with participants.

Projects

Pickin — Real-time giveaway platform Next.js, TypeScript, PostgreSQL

- Real-time participant and state updates via Server-Sent Events backed by Redis Pub/Sub.
- Scheduled giveaway start/end and automatic winner selection via NATS JetStream job queue.
- OAuth-gated participation rules (YouTube subscribe/like, Twitch follow) using Better Auth.
- RBAC system (4 roles, 15 permissions), i18n (TR/EN), QR sharing, OBS broadcast view, CSV export.
- Stack: Next.js 16 (App Router, Turbopack), Drizzle ORM, Tailwind CSS v4, Framer Motion, TipTap, Docker.

Deckplane — Distributed Docker management platform Bun, Hono, TypeScript, PostgreSQL

- Designed a control-plane / host-agent architecture: agents on each Docker host communicate with a central API via WebSocket and REST.
- Manage containers, images, networks and volumes across multiple servers from a single API with an async command queue.
- WebSocket-based interactive container terminal with session recording, plus real-time log and CPU/memory stat streaming.
- Deployment automation from GitHub repos or docker-compose archives, with OAuth-based GitHub integration (branches, secrets, webhooks).
- RBAC (4 roles), multi-tenancy, immutable audit logging, token-bucket rate limiting, auto-generated OpenAPI 3.0 + Swagger UI.
- Stack: Bun, Hono, Drizzle ORM, JWT (jose) + Argon2, Zod, Pino, AES-256-GCM, Traefik (HTTPS + WebSocket).

kommando — CLI toolkit for Go Go

- Lightweight library for building command-line tools with subcommands and flag parsing.
- Focused on ergonomic API design and zero external dependencies.

helper-tui — Terminal UI utility Rust

- Cross-platform TUI that streamlines common developer workflows from the terminal.
- Built in Rust with an emphasis on responsiveness and minimal binary size.

feather-stream — Google Drive media player Tauri, React, TypeScript

- Desktop application for streaming media files stored on Google Drive.
- Built end-to-end with Tauri (Rust core) and a React/TypeScript frontend.

jsonparser — JSON parser written in C C

- From-scratch JSON document parser and processor implemented in C.
- Hand-written tokenizer and recursive-descent parser; no external dependencies.

Certifications

- **Claude Code in Action** — Anthropic, Apr 2026. Credential ID: qenfi6q2dx7k.
- **AI Agent Development and MCP Fundamentals** — Siber Kulüpler Birliği, Jan 2026. Credential ID: SKB-2026-733OF.
- **Zero-to-Advanced Python Programming** — BTK Akademi, Jan 2025. Credential ID: OKMhqXvw04.
- **Google Flutter Mobile Application** — BTK Akademi, Jan 2025. Credential ID: L8dcn9b8V6.
- **Machine Learning with Python** — IBM, Feb 2025. Credential ID: 1H9MA1TRY556.

Skills

Languages: Python, R, TypeScript, JavaScript, GoLang, Rust, Dart
Data & ML: Pandas, Polars, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, PyTorch, SPSS
Backend: Bun, Node.js, Express.js, REST APIs
Frontend: React, Next.js, Tailwind CSS, Framer Motion
Mobile / Cross-Platform: Flutter, React Native, Tauri
Databases: PostgreSQL, MongoDB, MySQL, Supabase
Tools: Git, Docker, Drizzle ORM, Postman

Education

Istanbul Commerce University Istanbul, Türkiye
B.Sc. in Statistics 2023 – 2027
Anadolu University Eskişehir, Türkiye
Associate Degree in Computer Programming 2025 – 2027
