

Yiğit Efe Avcı Statistics & Data Science

yigit433.devs@gmail.com • github.com/yigit433 • linkedin.com/in/yigitefeavci • yigit433.vercel.app

Education

Istanbul Commerce University
B.Sc. in Statistics

Istanbul, Türkiye
2023 – 2027

Profile

Statistics undergraduate with a strong interest in data science, statistical modeling, and survey research. Hands-on experience with Python, R, and SPSS, alongside modern data libraries (Pandas, Polars, Scikit-learn). Combine nationwide fieldwork experience with software engineering skills used to build data collection, automation, and enrichment tools.

Experience

Konda Research and Consultancy

Field Researcher (Surveyor)

Türkiye

Month Year – Month Year

- Conducted fieldwork for nationwide surveys, including face-to-face interviews and data collection.
- Ensured accurate and reliable input for research projects by following methodological standards and engaging directly with participants.

WiFiCeps

Backend Developer (Project-based)

Türkiye

January 2023 – February 2023

- Built a Python-based automation framework with an FFmpeg-powered video processing pipeline.
- Designed a system that monitored Google Drive uploads, detected updates, and synchronized them with the platform automatically.
- Optimized video size and quality through automated processing, reducing files to approximately ~50MB.

Code Share

Managing Partner (Self-employed)

London, United Kingdom

August 2020 – May 2025

Software Developer (Freelance, Remote)

June 2019 – June 2023

Projects

Pickin — Real-time giveaway platform

Next.js, TypeScript, PostgreSQL

- Real-time participant and state updates via Server-Sent Events backed by Redis Pub/Sub.
- Scheduled job processing via NATS JetStream and OAuth-gated participation rules.

Deckplane — Distributed Docker management platform

Bun, Hono, TypeScript, PostgreSQL

- Control-plane / host-agent architecture; agents communicate with a central API via WebSocket and REST.
- Deployment automation from GitHub repos with RBAC, audit logging, and auto-generated OpenAPI 3.0 docs.

Skills

Data & Statistics: Python, R, SPSS, Pandas, Polars, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, PyTorch

Languages: Python, R, TypeScript, JavaScript, GoLang, Rust, Dart

Engineering: Node.js, Bun, Next.js, React, PostgreSQL, MongoDB, Docker

Tools: Jupyter, Git, Drizzle ORM, Postman
